Ecosystem Based Management of Large Marine Ecosystems

Environmental Development Journal

Vol. 17, Part 1 (January 2016)

Thematic Issue

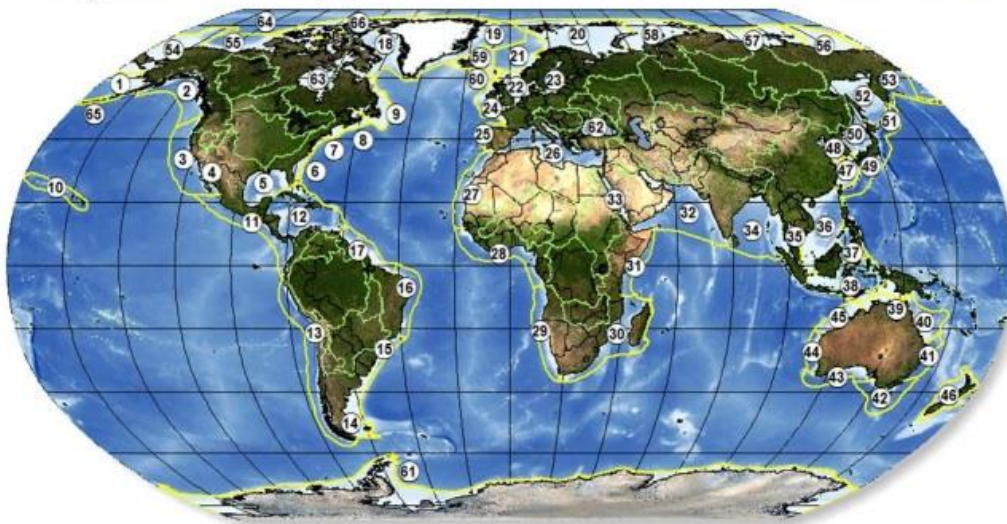

Editors

Kenneth Sherman and Hashali Hamukuaya

This definitive new volume presents results of an ecosystem based approach to adaptive management of the world's Large Marine Ecosystems, supported by studies of LME productivity, fish & fisheries, pollution and ecosystem health, socioeconomics, and governance.

Authors focus on results of natural science and social science assessments of human and environmental stressors in support of ecosystem based management practices to recover and sustain LME goods and services.

Large Marine Ecosystems of the World and Linked Watersheds
